## Summary

Motivated B-Tech 3rd-year student with hands-on experience in web development, Flutter app development, Arduino/ESP32 electronics projects, and multimedia editing. Completed multiple freelance projects and internships across technical domains. Skilled in building practical IoT solutions, developing functional websites and apps, and delivering client-focused digital services. Passionate about technology, learning, and end-to-end project execution

## Skills

**Web Development**
HTML, CSS, JavaScript

**Programming**
Python, C++, Matlab,

**App Development**
Flutter, Dart

**Arduino Programming**
C/C++

**Freelancing**
Web Development & Media Editing

**Video & Photo Editing**
After effects, Photoshop, Blender, Davinci Resolve

## Projects

- Personal Portfolio Website – Designed and deployed a responsive personal website showcasing projects and skills.
- QR Code Generator & Reader App – Built using Flutter with real-time scanning and code generation features.
- Electronics & IoT Projects – Developed systems using Arduino and ESP32 such as automation modules and sensor-based projects.

## Internships

- Indian Railway – Signals and Telecommunication Department, Palakkad division, Southern Railway
- Cedicom Electronics – Electronic component manufacturing and packing

## Education

- B-Tech (3rd Year) – Jyothi Engineering College, Cheruthuruthi
- Plus Two – Technical HSS, Perinthalmanna (2023)
- 10th – Tharakan Higher Secondary School, Angadippuram (2021)

## Certifications

- NPTEL – Internet of Things
- University of California, Irvine – The Arduino Platform and C Programming
